

SOURCE EMPLOYEES

TARGET: CREATE IN OWN DATABASE AND CREATE THE NEW CONNECTION

The image displays two screenshots of the Informatica Data Integration (DI) web interface. The top screenshot shows the 'Target Object' dialog box, which prompts the user to select an existing target object or create a new one. The 'Create New at Runtime' option is selected, and the 'Table Name' field is populated with 'ANS\_NEW\_EMP||TARGET'. The background shows the 'Employee\_Mappings' design canvas with a 'Source' and 'Target' component connected by a mapping arrow. The bottom screenshot shows the 'Employee\_Mappings' design canvas with a 'Source' and 'Target' component connected by a mapping arrow. The 'Target' component is selected, and the 'Properties' pane on the right shows the 'Details' tab. The 'Connection' is set to 'MSQL\_REWAN (SQL Server)', 'Target Type' is 'Single Object', 'Object' is 'ANS\_NEW\_EMP||TARGET', and 'Operation' is 'Insert'. The 'Invalid' status is visible at the top of the design canvas.

Informatica Data Integration

Target Object

Select an existing target object or create a new one. Any new target objects will be created when the mapping task is executed.

Target Object: ☐ Existing ☒ Create New at Runtime
